

# SINGLEFLOW SSDL

Centrifugal Box Fan

---

**ELTA**

# SINGLEFLOW SSDL

## Product Overview

- 8 standard sizes from 100 mm to 500mm
- Air volume flow rates up to 1.820 m<sup>3</sup>/s
- Static pressures up to 910 Pa
- Suitable for operating temperatures up to +60°C
- Suitable for External Mounting
- Acoustically lined as standard
- Choice of Circular/ Rectangular Spigots
- Demand Control Option Available
- Available in **EC**

**Singleflow SSDL fans are suitable for external mounting. The range incorporates advanced backward curved impellers.**

### Easy Installation

All models are designed for direct connection to standard diameter flexible or rigid circular ducting with long spigots.

### Easy Commissioning

Integrated commissioning control allows single speed selection and also limits maximum speed if used with an external potentiometer.

### Efficient Performance

High efficiency low tonal noise backward curved centrifugal impellers are directly driven by an EC external rotor motor, provide low specific fan powers and stepless speed control without tonal noise generation.

### Controllability

EC motors provide precise speed control via potentiometer, BMS or Elta's DCV control. Reduced fan speeds can provide significant cost-savings through lower energy consumption in both mechanical energy of motors and also on the conditioning of replacement air.

### Construction

Robust 1.2mm galvanised mild steel sheet casing. The casing is specially manufactured using integral motor mounting plates to provide additional rigidity for the casings. Each casing provides spigots to suit standard circular ducting.

### Motor

EC external rotor motor fitted as standard. The IP44 motor contains sealed for life bearings. All motors are suitable for use in ambient air conditions up to +60°C.

### Impeller

High efficiency low tonal noise backward curved centrifugal impeller, dynamically balanced to ISO1940-1 and directly driven by the motor to provide a smooth airflow through the unit.

### Duct Connection Options

Can be supplied with rectangular outlet & inlet spigots on request.

### Electrical Connection Options

Electrical cable entry from either side for ease of electrical connection as standard (a terminal box pre-fitted to either side can be ordered).

### Warranty

Each SSDL has a 12 month warranty.

### Typical Applications

- Toilets
- Hotels
- Schools
- Colleges
- Libraries
- Kitchens
- Factories
- Industrial Units
- Warehousing
- Offices

Data provided is at standard air density of 1.2 kg/m³.  
 ERP data in accordance with Regulation (EU) 1253/2014. Product category is NRVU. Measurement category used to determine energy efficiency: D.  
 Peak Amps @ 230V / 1PH / 50Hz.

A variable speed drive is integrated within the fan.

Tests and preparation of the sound data have been carried out in accordance with BS 848 Part 2:1985 at 50% peak pressure.

The overall A-weighted sound pressure level is at a distance of 3m with spherical free-field propagation. It is expressed in dB re-20µPa and is presented for comparative purposes only.

Silencer attenuation and pressure drop values calculated at 50% peak pressure.

Data provided at standard air density of 1.2 Kg/m<sup>3</sup>.  
 Tests and preparation of the sound data have been carried out in accordance with BS 848 Part 2:1985 at 50% peak pressure.  
 The Sound Power Level Spectra are in dB re-1pW.
